

KONICA MINOLTA

Colibri[®] platform
■ ■ ■ ■ ■

One software platform
for the global color supply chain

Giving Shape to Ideas

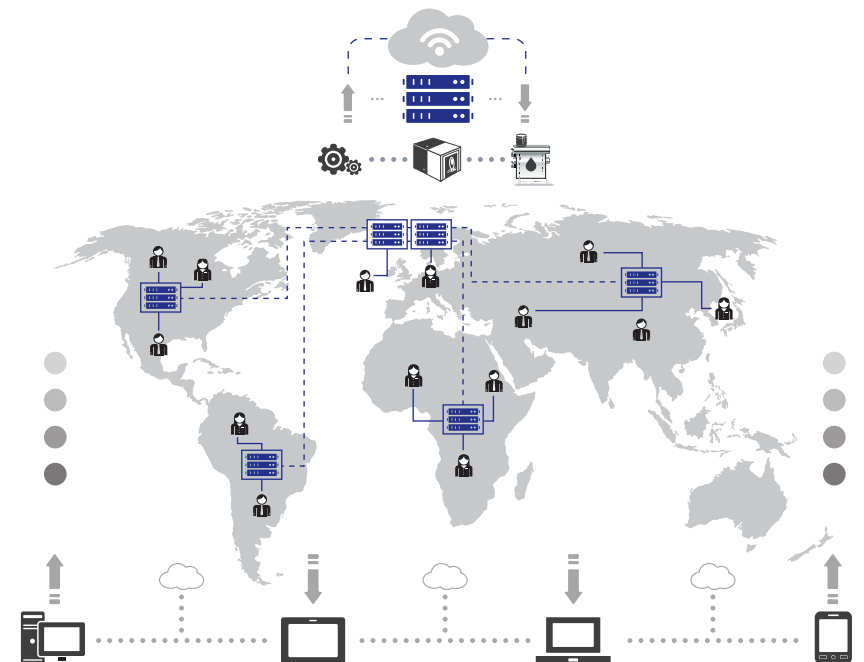

Professional Colour Management made easy

- Colour data from any third party system can be transferred into Colibri®
- A logical workflow and clear structure make it easy for new users to get started with Colibri®
- Colibri® includes a number of features developed to make it easy to operate, independent from the level of knowledge of the user
- The single platform concept simplifies the implementation of the system and the daily workflow

Share your Colour Data on your terms

- Integrate Colibri® with your IT-Infrastructure either on premise or as a web-based solution
- Share data internally or with your partners globally
- Manage access to features and data down to user level to satisfy any data security requirements
- Colibri® databases can be hosted in private or public clouds and can be used in off-line mode

Quick Return on Investment

- Colibri® helps you to save up to 50% of colorants - an enormous potential for cost savings
- Faster and more accurate recipe prediction can cut R&D and Production costs by up to 30%
- The system facilitates reuse of waste, saving costs and resources so that overall waste is reduced to a minimum
- A rapid return on investment is guaranteed

Improve Colour Quality at all stages of the value chain

- The Colibri® can be used at all stages of the Colour Management process, throughout the value chain

-  ColorSpec
-  ColorMatch
-  ColorTint
-  ColorQuality
- Solution Integration

Color Design & Specification

design specify

Production & Supply

produce control & approve supply

A unique global support network to improve your colour process

The excellent performance of software improving communication, resource efficiency and quality combined with unparalleled support make Colibri® the number one choice.
